Kids Eyes Count

C A M P A I G N

School Year

Dear Parents:

Students enter high school with new academic challenges. Many students also plan to become new drivers on our highways. Healthy eyes and good vision are essential for success in school.

Since academic learning is 80% visual and vision problems are best detected and treated early, an **eye examination by an optometrist or ophthalmologist is required for every child entering grade**

This will ensure a student's best visual ability in meeting the educational demands of high school. An eye examination will also determine if your teen meets the vision requirements for Driver Education *with or without* correction.

Please ask your eye doctor to complete the attached Vision First *Student Comprehensive Eye and Vision Examination Report*. Vision screening is *not a substitute* for an eye examination by an eye doctor.

A completed Vision First report will assist our teachers in providing an excellent educational program for your teen and will allow us to maintain the records in his/her health folder. **Please return a copy to our office by**

If you have any questions or if you need further information, please contact us at the number listed below. Thank you for your cooperation in support of our commitment to excellence in education.

Sincerely,

*High School Required Examination Letter with
Student Comprehensive Eye and Vision Examination Report
and optional Reference Page and/or fact sheet choice*
