School Year

Dear Parents:

The preschool years are an important period in your child's development. Your child learns new words and new skills each day. Your child also learns *how to see*. A child's success depends on healthy eyes and good vision.

Since eye and vision problems are best detected and treated early, a **comprehensive eye and vision examination is highly recommended for every child entering preschool**. This will ensure your child's vision is developing properly and if needed, care can be given without delay.

Please ask your eye doctor to complete the Vision First *Preschool Comprehensive Eye and Vision Examination Report*. Vision screening is *not a substitute* for an eye examination by an eye doctor.

A completed Vision First report will assist your child's teacher in providing an excellent educational program for your child and will allow us to maintain the records in your child's health folder. **Please return a copy to our office**

If you have any questions or if you need further information, please contact us at the number listed below. Thank you for your cooperation in support of our commitment to excellence in education.

Sincerely,

*Preschool Recommended Examination Letter with
Preschool Comprehensive Eye and Vision Examination Report
and optional Reference Page and/or fact sheet choice*
